Dear Executive,

The **new economy** in comparison with the prevailing environment of the 2008 financial crisis is **driven by asset owners, entrepreneurs and investors** who seek a **positive impact in their investments**.

There is, therefore, a **global growth of sustainable assets** driven by global challenges affecting our planet and **investors preference** who factor **social and environmental impact** into their investing decisions.

Connecting profit and impact is the **biggest challenge** for the financial industry as **impact investment** is set to become **mainstream**.

This conference will develop and detail how to **construct impact and alpha under the same model** and across **portfolios and asset classes** from **both investors and manager's perspective**.

Family offices, foundations, institutional investors and managers have different motivations, challenges and constraints that will be pragmatically detailed and discussed over panel discussions.

*Join our **100+ high profile participants** in Geneva next April 19th, 2018 and meet and discuss amongst investors and experts the **key challenges** to the **design, implementation, management, measurement and reporting of an impact strategy embedded in a total asset allocation and portfolio management**.*
